CRS Data Expands Into Northwest U.S. Central Oregon Association Chooses CRS Data MLS Tax Suite

KNOXVILLE, Tenn. – June 9, 2015 – [CRS Data](#), a leading provider of public record information, has expanded its tax data services into the Northwest U.S., through a new 3-year agreement with the [Central Oregon Association of REALTORS®](#). The association will provide its 1,500-plus members with access to the [CRS Data MLS Tax Suite](#), a newly designed online-accessible product that makes property data available on almost any mobile or tablet device.

“After an extensive review process, CRS Data’s MLS Tax Suite emerged as the most logical tax data service to meet the needs of our 1,500-plus members,” said Casie L. Conlon, CEO of the Central Oregon Association of REALTORS®. “We’re proud to be the first association in the Pacific Northwest to utilize one of the fastest growing tax data suppliers in the U.S.”

[CRS Data’s](#) 3-year agreement provides members of the Central Oregon Association of REALTORS® with online access to a wide variety of property tax data. From customizable maps and a refined values feature, which approximates the value of home additions or expansions, to comparables information and in-depth search capabilities, CRS Data’s MLS Suite has been thoughtfully designed to maximize ease of use.

“Our board and members have been clear that access to customer service representatives was important, along with a simplified process for pulling and refining reports,” said Conlon. “From the trainings that are available to the CRS Data HelpDesk, their team goes above and beyond to create the full package we know our members demand.”

“One of the key deciding factors in choosing our multiple listing service was CRS Data’s ability to work with our county government offices to get tax data, that is not currently available online, converted to an online format for our members to access,” said Conlon. “Our goal is to help our members be the local experts in real estate by providing much needed information for their clients.”

Headquartered in Knoxville, Tenn., CRS Data currently provides access to comprehensive property data resources in more than 12 states and 500 counties. The company most recently expanded its data service to include 67 counties in Florida. Servicing bankers, MLSs, appraisers, investors, and other specialty financial customers, CRS Data is focused on providing accurate and timely property data, quality products and unparalleled customer satisfaction.

“We are thrilled to be entering into a new market, bringing with us the tax data tools and resources our teams have worked tirelessly to build,” said Nikki Morgan, MLS sales executive for CRS Data. “CRS Data has grown sustainably since our inception in 1989. Moving into the Pacific Northwest seemed like a logical next step as we continue to service new customers.”
